

AISECT, which is India's leading Social Enterprise working in the area of skill development, has partnered with **Microfocus HPE (Hewlett Packard Enterprise)** and **Neosys systems** to train over 500 students in a year on high-end niche skills and create a pool of trained manpower on skills which are in high demand in the market. Under the partnership, AISECT aims to deliver skilling not only through ICT-based classroom sessions but also assist students with live and semi-live projects, virtual internships, on the job training as well as placement support.

Micro Focus International plc is a multinational software and information technology business based in England. The firm provides software and consultancy. After the acquisition of Micro Focus by Hewlett Packard Enterprise's software business segment, it is now termed as Microfocus HPE

AISECT's association with Microfocus HPE will have two major streams – Retail and Integrated B.Tech Programmes. Students will be provided specialization courses across five skills, i.e. Artificial Intelligence/Machine Learning, DevOps & Dockers, Cyber Security, Big Data and Quality Engineering.
